

COMPANY PROFILE | KUWAIT 2026

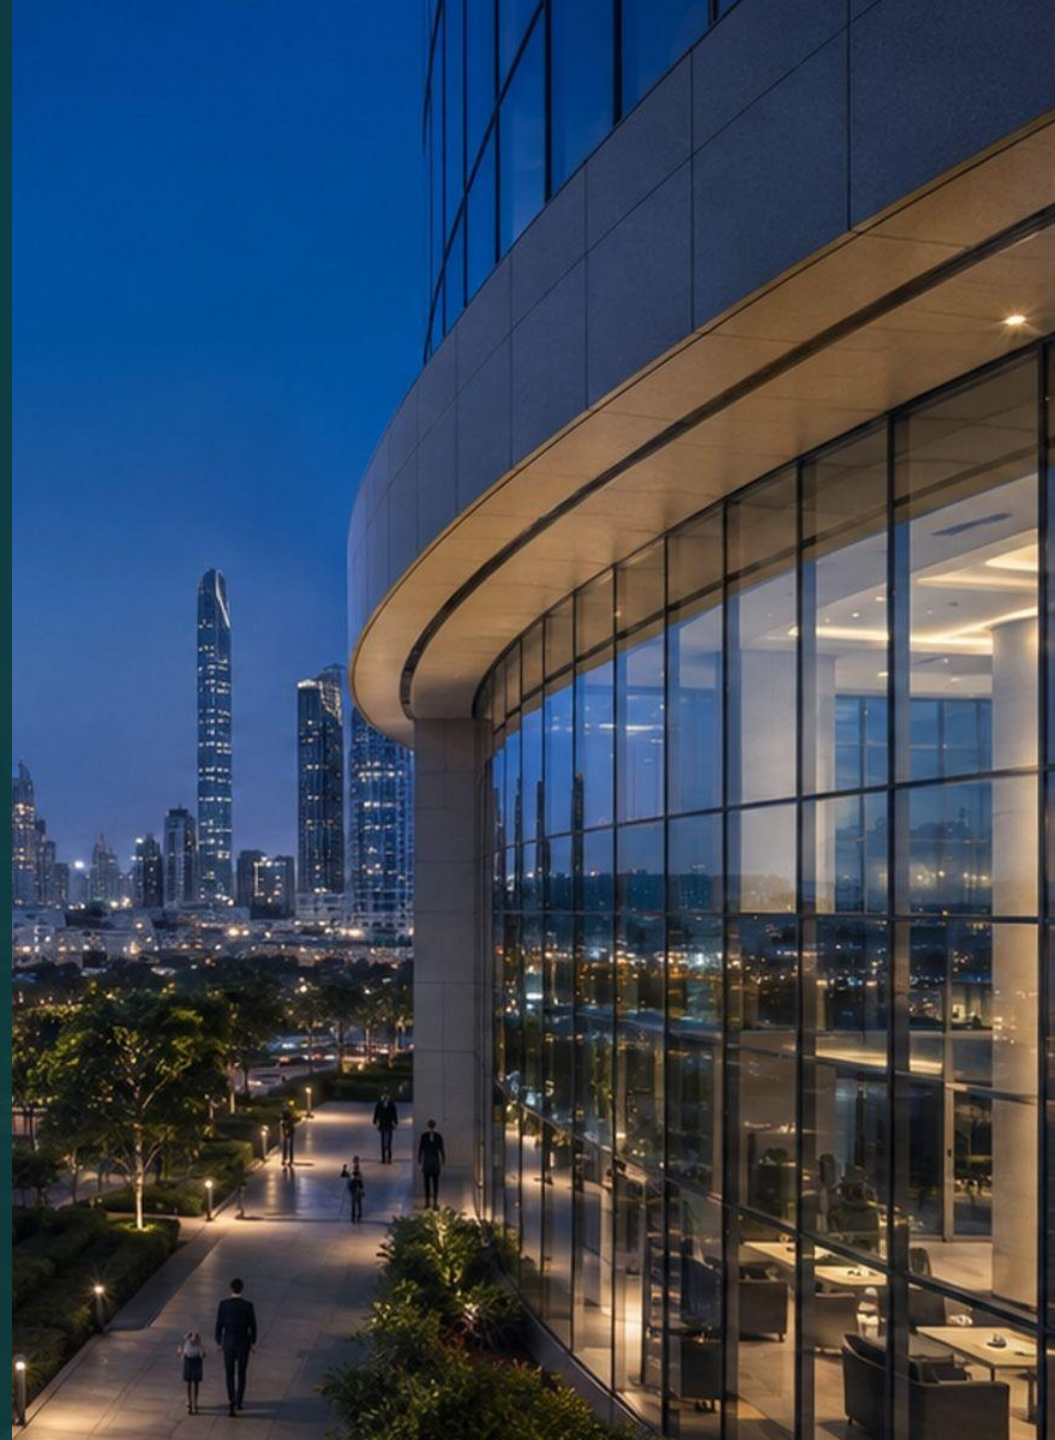

Company Profile

National Vision Security Systems Company (W.L.L.)

Security • Life Safety • Connected Infrastructure

Integrated technology from design through lifecycle support.

www.nvasp.com

Integrated Technology Expertise in Kuwait

Established in Kuwait in 2007, National Vision Security Systems Company (W.L.L.), known as NVC, delivers integrated security, life safety, IT, ELV, electrical and smart-building solutions for residential, commercial, institutional and industrial clients.

We provide a single point of coordination from consultation and engineering through supply, installation, integration, commissioning and ongoing support, helping clients protect people and assets, gain operational visibility and plan for growth.

2007

Established in
Kuwait

End-to-end

Delivery model

Multi-system

Integration
expertise

Local

Engineering and
support

One Accountable Partner

A single point of coordination from first consultation to long-term support.

Advisory

Site surveys, requirements, risk priorities and practical roadmaps.

Engineering

System architecture, design, coverage, capacity and compliance planning.

Delivery

Procurement, installation, integration, testing and documented handover.

Support

Training, preventive maintenance, troubleshooting, upgrades and expansion.

OUR FOCUS Protect people, assets, information and operations while improving visibility, control and long-term value.

Mission, Vision and Values

MISSION

To deliver reliable, integrated technology solutions that protect people and assets, strengthen operations and create measurable client value.

VISION

To be Kuwait's trusted partner for intelligent security, connected infrastructure and AI-enabled environments.

The values behind our work

Integrity

Clear commitments and responsible advice.

Quality

Disciplined engineering and documented results.

Innovation

New technology only where it improves outcomes.

Accountability

Ownership from first requirement to long-term support.

Partnership

Solutions built around the client's operating reality.

Continuous Improvement

Learning, training and structured service enhancement.

Integrated Systems and Solutions

Security and Access

CCTV, access control, intercom, barriers, intrusion and monitoring.

Fire and Life Safety

Fire alarm, fire and gas, and public address and voice alarm.

Smart Buildings and IFMS

Facility management, automation and environmental visibility.

Networks and Communications

Networks, DWDM, structured cabling and IP telephony.

AV and User Experience

Meeting rooms, digital signage, background music and home cinema.

Electrical and Power

UPS, electrical contracting and coordinated power infrastructure.

Mobility and Energy

EV charging, GPS tracking, fleet intelligence and mobile DVR.

AI and Automation

Video analytics, anomaly detection, smart search and workflows.

CCTV and Video Management (VMS)

Video systems engineered around coverage, image quality, retention, cybersecurity and operator usability.

IP CCTV and Migration

New IP systems and analog-to-IP migration.

VMS and Control Rooms

Central multi-site monitoring with audit trails.

Storage and Retention

Capacity planned to retention policy.

Camera Applications

Fixed, PTZ, thermal, panoramic and low-light.

AI Analytics

Perimeter protection, counting and ANPR.

Mobile and Vehicle Video

Mobile DVR with GPS and wireless links.

COMPLIANCE Where applicable, designs align with Kuwait Ministry of Interior requirements, client policies and approved retention objectives.

Access Control and Site Security

Identity, access, intrusion and workforce systems working together for consistent control of people, doors and sensitive areas.

Access Control

Card, biometric, PIN and mobile-ready options.

Time Attendance

Face, fingerprint and card with workforce reports.

Intrusion Alarm

Wireless and wired detection, panic and perimeter.

Smart Locks

Connected door control for homes and offices.

Guard Tour

QR, NFC and beacon patrol monitoring and reports.

Barriers and Screening

Gates, turnstiles and walk-through detection.

ONE PICTURE Access events, alarms, video evidence and patrol actions are linked into one audit trail for faster verification.

Fire Detection and Life Safety

Fire Alarm

Control panels, detectors, manual call points and notification devices, with design, installation, interface coordination, testing and maintenance.

Fire and Gas System

Detection configured to site risks and operational needs, with architecture, testing and documentation defined to the approved scope.

Public Address and Voice Alarm

Zoned announcements and emergency voice messaging, designed for coverage, speech intelligibility, monitoring and approved fire alarm interfaces.

Smart Buildings and Facility Management

IFMS Integrated Facility Management

Integrated monitoring of alarms, equipment status and maintenance data, with dashboards and workflows that help operators coordinate response and review performance.

Automation and scenes

Security and intercom

Smart Buildings and Connected Homes

Lighting, climate, security, intercom, audio and energy control in one simple experience, supporting KNX, Zigbee, Z-Wave and Wi-Fi ecosystems.

Audio and entertainment

Energy and comfort

Network, Optical and Power Infrastructure

Networks and Structured Cabling

LAN, switching, Wi-Fi and segmentation, with Cat6/Cat6A and fiber cabling planned for capacity and growth.

DWDM Optical Transport

Multiple optical channels over one fiber infrastructure, planned for link requirements, capacity and future expansion.

UPS and Equipment Rooms

Backup sized to load and runtime, with racks, patching, monitoring and coordination with the electrical design.

VALUE ENGINEERING

Reuse what already works

Where technically sound, existing fiber backbones and network switches are assessed for reuse to reduce cost, time and unnecessary civil work.

Communications and Audio-Visual

Intercom

Audio and video door stations, integrated with access control where supported.

IP Telephone

IP PBX, business handsets, call routing, configuration, training and support.

AV System

Displays, sound, conferencing and control for meeting and presentation spaces.

Also delivered: digital signage, background music, queue management, POS integration and home cinema.

Applied AI for Operational Visibility

AI Video Analytics

People and vehicle classification, perimeter events, counting, heatmaps and ANPR.

Event Intelligence

Alert correlation and priority scoring that reduce noise and speed escalation.

Smart Search

Find footage and operational data faster for investigations and reporting.

Predictive Monitoring

Spot unusual trends and equipment health issues earlier.

Secure AI Assistants

Private knowledge assistants for approved documents and procedures.

Workflow Automation

Connect alerts, approvals, dashboards and reports across systems.

DELIVERY APPROACH — with human oversight, client-defined governance and privacy controls

Monitoring, Mobility and Energy

Environmental monitoring

Real-time monitoring for server rooms, telecom spaces, warehouses, cold storage and other critical environments, tracking temperature, humidity, water leaks, smoke, power and door status.

- **24/7 visibility:** central dashboards and trend history
- **Multi-channel alerts:** configurable notification and escalation
- **Corrective action:** approved responses at defined thresholds
- **Reporting:** historical records for maintenance and audits

Mobility and energy

Electrical capacity, network connectivity, secure access, video, location data and reporting are coordinated as one system rather than a collection of devices.

- **EV charging:** residential and commercial, with site assessment
- **GPS tracking:** live location, trips, zones and alerts
- **Mobile DVR:** vehicle video over Wi-Fi, cellular and GPS
- **Fleet intelligence:** dashboards for safety and accountability

Project Delivery and Lifecycle Services

01 Discover

Consultation, site survey, risk review and existing-system assessment.

02 Design

Architecture, coverage, schematics, capacity, BOQ and implementation plan.

03 Deliver

Procurement, logistics, installation, configuration and project management.

04 Enable

Commissioning, acceptance testing, training and structured handover.

05 Support

Warranty coordination, preventive maintenance, service response and upgrades.

06 Optimize

Performance review, health monitoring, analytics tuning and roadmap updates.

WHAT CLIENTS RECEIVE

A defined scope, architecture and responsibility model

Documented testing, commissioning and handover records

Operator and administrator training

A support path for maintenance, change and expansion

Industries We Serve

Government, Public Sector, Oil & Gas

Secure facilities, access and resilient infrastructure.

Banking and Finance

Evidence, controlled access, uptime and audit trails.

Education

Campus safety, attendance, access, networks and PA.

Healthcare

Controlled areas and critical-environment visibility.

Hospitality

Guest-sensitive security, smart access and energy control.

Telecommunications

Data rooms, environmental monitoring and physical security.

Construction and Industrial

Perimeter security, mobile surveillance and safety support.

Retail and Commercial

Loss prevention, analytics, POS, signage and customer flow.

Residential and Mixed-Use

Smart security, automation, energy and building-wide integration.

Transport and Fleet

Vehicle tracking, mobile video, charging and visibility.

Selected Organizational Experience

Ministry of Defense	National Assembly	Kuwait Fire Services Directorate
Al-Diwan Al-Amiri	Kuwait Civil Aviation	Ooredoo Kuwait
National Guard	Ministry of Higher Education	Mutawa Al-Kazi Automotive
Arab Open University	American University of Kuwait	Al Mulla Group
Kuwait Hotels Company	Kuwait Hospital	KUFPEC

Organizations referenced in National Vision’s company records; project scope varies by engagement.

Public sector environments

Critical facilities and operations

Multi-site commercial deployments

Lifecycle support and modernization

Technology Ecosystem and Quality

Video and VMS

Axis Communications • Milestone
• Honeywell • Uniview • Hikvision

Alarm, Access and Workforce

Ajax • Axis • HID • QR-Patrol • smart
lock and screening platforms

Monitoring, Network and Mobility

AVTECH • Huawei • Teltonika • excel
Networking • Navtech Radar
• structured infrastructure partners

Smart Environment and Energy

Incoresoft • Loxone • EVBox •
interoperable automation and
charging ecosystems

Platform selection is project-specific, based on technical fit, interoperability, compliance, availability, lifecycle support and client approval.

Quality and compliance commitments

- ✓ Requirements traceability from design to handover
- ✓ MOI-aligned security design where applicable
- ✓ Documented testing, labeling and commissioning
- ✓ Cybersecurity-conscious architecture and segmentation
- ✓ Client-defined privacy, retention and access controls
- ✓ Training, warranty and long-term support
